Professional Summary

Computer Scientist (UENP) and postgraduate student in Data Science and Analytics (USP), with solid experience in developing data-driven and artificial intelligence solutions. Currently working as an AI Engineer at Monest, leading the development of generative AI agents for debt recovery, with a focus on automation, personalization, and scalability.

Proven track record in building strategic analyses, process automation, and machine learning models in Python, as well as developing interactive dashboards in Power BI. Hands-on experience with SQL, Databricks, LangChain, LangSmith, Metabase, and Git, among other technologies aimed at transforming data into business intelligence.

Driven by challenges and guided by a constant pursuit of efficiency, innovation, and tangible impact on strategic decision-making.

Core Skills

Machine Learning • LangChain • Databricks • SQL • Git & GitHub • LangSmith • Power BI • Python • RAG • LLM Fine-Tuning • API Integration • Data Visualization • Process Automation

---

Professional Experience

Monest — *AI Engineer*

Jan 2025 – Present | Curitiba, PR, Brazil
Responsible for creating and evolving personalized AI agents for debt negotiation, aiming to maximize financial results through human-like and scalable interactions.

Key responsibilities and achievements:

- Creation, training, and customization of AI agents according to each client's debtor base profile.
- Application of **RAG** techniques and **LLM fine-tuning** to ensure accuracy and consistency.
- Design of **prompting strategies** and **conversation flows** aligned with collection policies.
- **System integration with API/Rest** and development of scalable, efficiency-oriented solutions.

- Technical documentation, requirements analysis, and continuous performance monitoring.
- Use of **Git, GitHub, LangSmith, and Metabase** for version control, performance evaluation, and analytics.

Zé Delivery — *Performance and Planning Data Analyst*

May 2024 – Dec 2024 | São Paulo, Brazil
Developed strategic analyses and dashboards focused on logistics KPIs and point-of-sale (POS) support, directly impacting operational efficiency and NPS improvement.

Key activities:

- Data modeling and large-scale processing in **Databricks**, integrating multiple datasets for key indicators.
- Creation of dynamic dashboards in **Power BI** (backend with SQL and Python), complemented by **Metabase** visualizations.
- Identification of operational bottlenecks and POS needs, enabling customized and effective actions.
- Support for strategic decision-making and continuous process improvement in logistics and customer service.

Ambev — *Performance Data Analyst*

Feb 2024 – Apr 2024 | Curitiba, PR, Brazil
Focused on performance KPIs for the southern regional branch, including **sell-in/sell-out volume**, coverage, and distribution.

Key responsibilities:

- Built Power BI dashboards for KPI tracking using **DAX Studio** and Import model.
- Deployed regional goals at sales team level.
- Trained new interns in the analytics team.
- Automated internal processes using **VBA, Python, and Power Automate**.
- Provided analytical support to multiple teams and specialists.

Ambev — *Pricing Data Analyst*

Feb 2022 – Feb 2024 | Curitiba, PR, Brazil
Ensured visibility and efficiency in pricing processes through automation and analytics.

Main accomplishments:

- Created **SQL queries** for strategic data extraction and analysis.
- Trained interns in the pricing department.
- Conducted ad-hoc resource consumption analyses for process optimization.
- Automated workflows using **Python** and **Power Automate**.
  Built and maintained **Power BI dashboards** focused on regional pricing KPIs.

- Provided continuous support to pricing specialists and partner areas.

Ambev — *Sales Lab Intern*

Aug 2021 – Feb 2022 | Curitiba, PR, Brazil
Worked on pricing and market intelligence initiatives supporting multiple departments in the southern region.

Key contributions:

- Extracted and processed data using **SQL** for analysis and reporting.
- Maintained KPIs such as TTV, TTC, market share, price index, and contribution in **Excel** and **Power BI**.
- Automated internal processes with **VBA** and **Power Automate**.
- Conducted ad-hoc Excel analyses to support sales, specialist, and executive decisions.
- Built Power BI dashboards for regional KPI tracking and provided technical data support to internal clients.

Education

MBA USP/Esalq — *MBA in Data Science and Analytics*
Feb 2024 – Mar 2026

State University of Northern Paraná (UENP) — *B.Sc. in Computer Science*
2018 – Mar 2022

ETEC – State Technical School of São Paulo — *Technical High School in Computer Science*
2015 – 2017

Certifications

- **Databricks Generative AI Fundamentals**
- **Scrum Fundamentals Certified**
- **Get Started with Data Engineering (Databricks)**
- **Microsoft Power BI for Data Science**

Languages

- **English:** Professional Level (B1)
- **Portuguese:** Native
